

## Usage of Tokyo Big Sight up to FY2012

With the economy showing signs of recovery, 275 events were held at Tokyo Big Sight last fiscal year(2012), attracting 13.45 million visitors, which exceeds the number of visitors in the previous fiscal year(2011). As part of our company's business, JIMTOF2012 (Japan International Machine Tool Fair) was held in November of last year, with 815 companies presenting booths and 130,000 visitors attended; these results surpassed those of the previous JIMTOF in 2010.

We will continue to work together with trade show organizers to help grow the Japanese trade show industry and contribute to industrial promotion.
